

About WRMC	<ul style="list-style-type: none"> • 130-bed hospital; serving more than 331,000 citizens of North Carolina’s Wilkes County and surrounding areas. • Staff includes more than 85 active medical professionals.
About Their AutoPulse Usage	<ul style="list-style-type: none"> • WRMC is the first hospital in North Carolina to purchase the AutoPulse™. • The AutoPulse is deployed in the Emergency Department, which handles more than 30,000 visits annually.
What WRMC Clinicians Say About the AutoPulse	<p>“The AutoPulse, which replaces manual chest compressions, is designed to maintain blood flow to the heart and brain, and throughout the body. It is a vast improvement in the CPR concept because it is much more efficient than manual chest compressions. It also helps to free up space around the patient so there is more room to work.”</p> <p style="text-align: right;">Darren Shumate, RN, BSN Emergency Department Charge Nurse</p> <p>“Wilkes Regional Medical Center operates a busy emergency room, and our goal is to make sure that we provide the best medical attention possible. We are excited to have something new that is possibly going to increase survival rates of our cardiac arrest patients.”</p> <p style="text-align: right;">David Culler, RN, EMT-P, CEN Director of the Emergency Department</p>
What WRMC Administration Says About the AutoPulse	<p>“For more than 50 years, our goal has been to consistently provide the best, most modern medical care available. Achieving this goal involves researching and finding new tools that allow us to provide that care. We believe the AutoPulse is just such a tool. Our clinicians can now do more for cardiac arrest patients, giving them the best possible chance of survival.”</p> <p style="text-align: right;">Thomas K. McMahan, MD Director of Medical Affairs</p>
